APM Photo Kiosk.

Your fast and easy ordering station—
intuitive and full of creative products
customers love.

Lucidiom's APM is self-service digital photo kiosk software that allows consumers to order prints, enlargements, CDs, DVDs and pretty much anything with a photo on it... greeting cards, calendars, photo books, posters, scrapbook pages, collages, notepads, canvas wall art, gifts or even custom retailer-created products. Lucidiom provides thousands of creative product designs for just about any occasion.

The APM software is customizable, allowing each retailer to tailor the APM to fit his or her brand, market and business.

The APM will fit seamlessly within a lab configuration as it connects to any printer for easy instant, back-lab or remote production. The APM collects data about each order that is sent to the APM Network and organized for easy analysis. The APM was introduced in 2001, and the software and offerings continue to be refined and enhanced to stay current with new technologies, market trends and consumer demand. There are currently near 64,000 APM installations worldwide.

- White label means the kiosk is your brand

- Easy interface for prints, gifts and creative products

- Add your own custom content

- Access Facebook and iPhone pictures

- Hundreds of products, thousands of creative designs

- Matching website for consistent brand and product line

APM Software & Hardware

Install the APM software on your own kiosk hardware or computer or purchase the software on our APM 3700. The APM 3700 kiosk features an EasyReader™ card reader, an ADA-approved adjustable negative-tilt 17" screen, a fast Core 2 Duo processor, 4GB RAM, 160GB hard drive, a bright (420 nits) screen, customizable acrylic framed monitor graphic, built-in receipt printer and an integrated CD/DVD burner... everything you need in a kiosk, bundled into one compact (17"w x 12"d x 22"h) unit. The 3700 will fit easily on your countertop and connect easily to your new or existing printers.

Product Dimensions	Screen	Processor	RAM	HD
17"w x 12"d x 22"h	17"	Core 2 Duo	4GB	160GB

Consumers can use pictures from a camera card, USB, scanner, CD, DVD, Photo Finale site or smartphone on the kiosk. And, with the Facebook/iOS Connect, users can even access their Facebook pictures or directly connect an iPhone and use the photos in any product the kiosk offers.
